

Parents have the ability to view their students' course content (assignment due dates, assignments, course modules, etc.) by creating a Canvas "Observer" account linked to their student(s) account. Once a parent creates an account, he/she may use that same account each year.

What can Observers do in Canvas?

- See the course modules page Preview course documents
- View the course calendar
- View course announcements
- Access their student's conversations (course messaging), if copied by the teacher and/or student.
- Communicate with the teacher

What can Observers not do in Canvas?

- Submit assignments or take quizzes
- Join course groups
- Send messages to students
- See course rosters
- Access unpublished courses

Please note:

- To create an account and link to your student, your student must first generate a Pairing Code and share it with you. This code is only valid for 7 days or one use. If the code expires before you use it, simply have your student generate a new code.
- The student must be enrolled in courses before you can sign up to observe the student.
- Directions for linking to multiple students are located on the last page of this document.
- Once you create your account, you will log in using your email address as your username and the password will be one that you created.

Instructions:

Step 1:

Your student will generate an access code by **signing in to his/her account** on their chromebook. (NOT a mobile device).

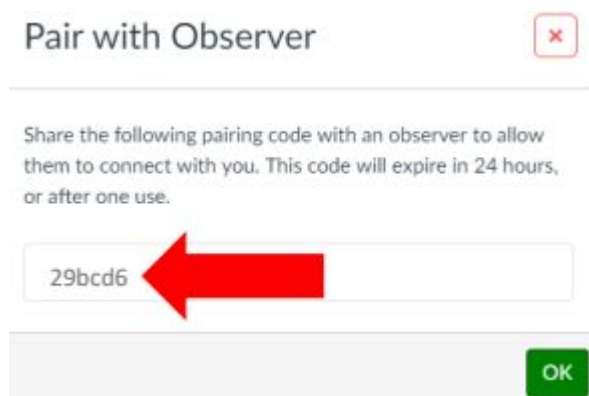

(Students log in using the Fortress of Knowledge on their chromebook.)

Once signed in to Canvas

1. On the left hand side under the logo, click the **Account** icon  then click **Settings** from the slide out menu.
2. Click the **Pair with Observer** button from the right side menu.

3. The student will then copy the six-digit alphanumeric pairing code, and share the code with the parent/observer who will link to the account. The code is valid for 7 days or one use.

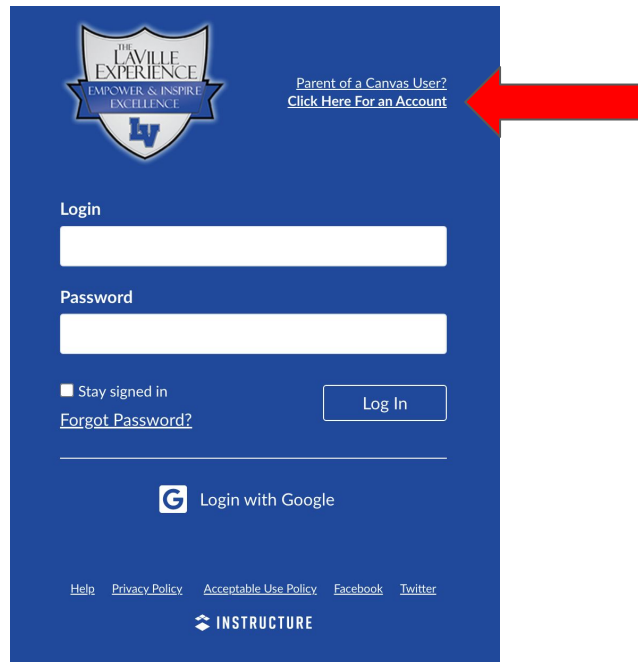

Step 2:

On a desktop or laptop computer, go to <https://unorth.instructure.com>

Tip: Bookmark this site for future access.

Click on the **Parent of a Canvas User? Click Here For an Account** text.

Step 3:

Complete the Parent Signup form and click Start Participating.

A screenshot of a 'Parent Signup' form. The form is titled 'Parent Signup' and has a close button (x) in the top right corner. It contains several input fields: 'Your Name*', 'Your Email*', 'Password*', 'Re-enter Password*', and 'Student Pairing Code*'. A red arrow points from the left side of the image towards the 'Student Pairing Code*' field. To the right of the 'Student Pairing Code*' field is a link that says 'What is a pairing code?'. Below the input fields is a checkbox with the text 'You agree to the terms of use and acknowledge the privacy policy.' At the bottom of the form are two buttons: 'Cancel' and 'Start Participating'.

Step 4:

Log in to the email account you provided in step three. Open the **Confirm Registration: Canvas** email from Canvas by Instructure. Click the link provided to finish the Registration process.

Step 5:

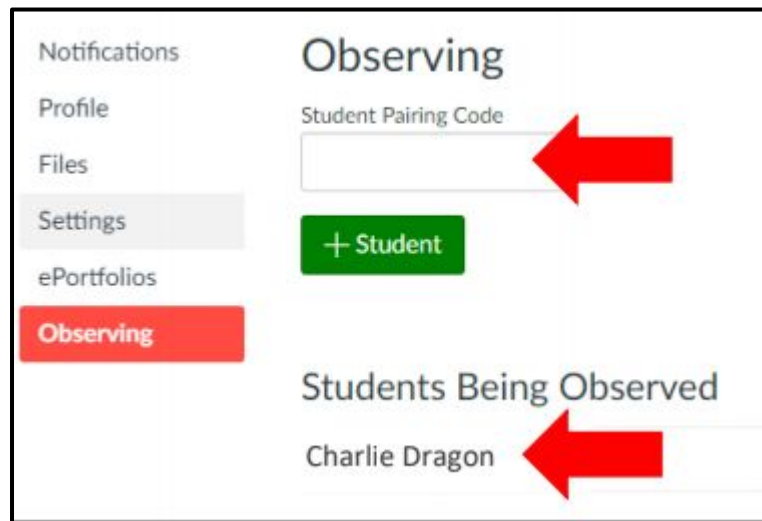

Return to Canvas (<https://unorth.instructure.com>) to view the courses where your student is enrolled. Click the **Courses** icon on the left side, select **All Courses**, and click the title of the course from the list. If a course is not “clickable,” it means that the teacher has not published the course. *Please email your student’s teacher if you have questions about access.

More than one LV Student using Canvas?

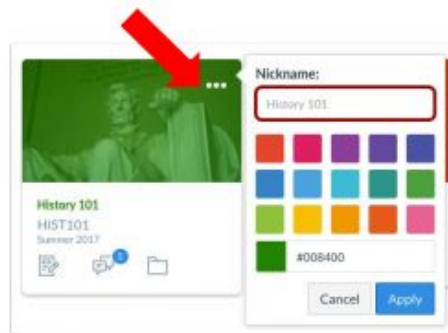

If you have more than one student who is working in Canvas this year, have the additional student(s) generate a pairing code following the same process described in step one. Once you have the additional pairing code:

1. Log in to your Canvas Observer account on a desktop or laptop computer.
2. Select Account on the left hand side, then select Settings from the slide out menu.
3. Select Observing from the navigation.
4. On the Observing page, enter the additional student's pairing code, then select + Student.
5. Under Students Being Observed you will see a list of students you are connected to/observing.

Tips for managing multiple students in Canvas:

As a Parent Observer, you have access to a lot of great information, and it can be challenging to navigate the information efficiently, especially if you are actively monitoring the courses of more than one student. Depending on how many students you follow and in how many courses your students are enrolled, the dashboard can become overwhelming. Below are a few tips for managing multiple students under your single Parent Observer account:

Course Nicknames

- You may adjust the nickname for each course. That way, you can include each child's first initial or name ahead of the course name (ex- K: US History or Kelly: US History).
- Course nicknames appear in the Dashboard, course navigation menu, course breadcrumbs, and notification emails. The nicknames will also appear on the Canvas app.
- The course nickname is only available to the individual user who created the nicknames.
- To access the nickname field, click the three dots in the top right hand corner of the course card.

Course Colors

- Another option is to color code the course cards so all of child #1's courses are one color, all of child #2's courses are a second, etc.
- The color that is shown on the course card is synced with the color shown for the course in the Calendar.
- The course card colors are only available to the individual user who selected the colors.
- To select course card colors, click the three dots in the top right hand corner of the course card.
